

Tons de Pedra - Mármore e Granitos do Mundo

Tons de Pedra imports, transforms and markets stone products, from the raw material to the finished product, seeking to satisfy both the professional market and the final consumer.

With its warehouse located in the area of PêroPinheiro, Tons de Pedra's spacious modern premises are open to anyone who wishes to pay a visit. Feel free to wander around our 1500m² warehouse, viewing the various stone slabs of different hues and qualities, or make yourself at home in the comfort of a display room, where you can choose the marble most suitable for your project.

The company's constantly updated collection today includes more than 100 different types of stone, from marble and onyx to granite, travertines, limestones and slate. Constantly investing in the discovery of new colours and unique geological formations, Tons de Pedra aims to offer all the different tones and shades of stone that nature will allow.

Offering first-class customer service, high quality and transparency in its dealings, the company also has a collection of quartz and marble agglomerates, and stocks products to treat and protect natural stone that have been engineered using the most modern technology.

Tons de Pedra is a compulsory port of call for architects, designers and planners, a space where natural stone is displayed, developed, commercialized and discussed at all times.
